SRS²

SRS² *Dynamic* R12 Upgrade Package

Virtually every enterprise running Oracle 11i will soon be upgrading to the Oracle R12 E-Business Suite. As a long-term Oracle partner and leading global Oracle Application life-cycle specialist, SRS² can help you make the transition to R12 quickly and easily, with all the required risk mitigation your organization demands – for a fixed cost.

Fast. Efficient. Cost Effective.

A major application upgrade to R12 can be complex, difficult and risky. But with the right technology and methodology, it doesn't have to be. As a trusted Oracle partner for more than a decade, SRS² has developed an innovative "Dynamic Upgrade" model for Oracle upgrades. This approach saves you time, money and headaches through a unique combination of operational approach, utilization of SRS²'s SmartService Platform and process automation that streamlines and future-proofs the entire upgrade process:

- **Fast and efficient.** SRS² can quickly and efficiently upgrade the earlier versions of your Oracle applications to Oracle R12 E-Business Suite, using our innovative Dynamic Upgrade approach. Employing proven methodologies and our SmartService Platform, we standardize the upgrade process using an efficient, repeatable production model.

- **100% Oracle compliant**. Our process ensures that your application customizations configurations, extensions, modifications, localizations, and integrations (CEMLI) will be fully compliant with current Oracle standards and specifications for R12 compatibility requirements.

- **Dependable, proven results.** Leveraging our proprietary SmartService Platform and tool-sets, SRS² will configure your functional set-ups so that your existing business flows run seamlessly on R12.

- **Fixed pricing.** Our Dynamic Upgrade process enables SRS² to implement and manage your R12 upgrade from start to finish, all for a fixed price — eliminating uncertainty, risk and cost overruns.

Here's how it works:

Step 1: Automated Assessment

First, we thoroughly analyze your current Oracle installation. An SRS² upgrade specialist will conduct a comprehensive assessment of your Oracle environment to determine its level of complexity. Based on those results, we'll generate a CEMLI impact assessment report, scope of work and a fixed-cost proposal for the R12 upgrade — all within 72 hours.

Step 2: Technical and Functional Upgrade to the Oracle R12 E-Business Suite

After you approve our proposal, we'll begin upgrading your system to the latest version of Oracle R12 E-Business Suite, complete with all the necessary configuration and functional setups. As part of our innovative Dynamic Upgrade process, our expert team employs proven, repeatable processes to fully test each upgrade round, ensuring a smooth final production cutover. Our SmartService Platform streamlines upgrade execution and facilitates simple, open communication among all parties for maximum accuracy and efficiency.

Step 3: Future-Proofing Your Oracle Applications

Working closely with your IT team, we develop a clear roadmap that future-proofs your Oracle applications that can save you time, money and disruptions by:

- Utilizing cloud-based management services
- Rationalizing and reducing customizations
- Implementing SOA as the integration architecture

SRS² Customization Management

We can also further analyze your current application customizations (CEMLIs) to make them compliant with Oracle Best Practice requirements and provide you with a clear comprehensive customization reduction plan. SRS² experts are ready to work with your business analysts to minimize your customizations to reduce complexity and enhance performance.

Business Focused

With assistance from SRS² and utilizing our unique Dynamic Upgrade model, your enterprise can upgrade to the latest version of Oracle R12 E-Business Suite in as few as 120 days. Besides saving time and money, a partnership with SRS² enables your enterprise to focus its resources on core business issues and meet the demands of your business community.
